

## ProFilloMat 155

Based on the ProFill155 the ProFilloMat155 operates touch screen controlled Jeros AutoFilloMat.

Instead of the foot pedal operation the ProFilloMat155 will, after insertion of the cartridges, run the filling process of the cartridges fully automated. Parameters can be set in 25 different recipes in the program logic control. Optionally up to 4 AutoFilloMat units can be operated with the same unit!

To fill higher volumes of tank cartridges with Jeros AutoFillomat we decided to develop the Profillomat155!

Optionally up to 4 Autolilomat units can be operated with the same unit!  
Also optionally we supply the AutoFillomat with a stainless steel cylinder to avoid breakdowns of the plastic syringe in industrial operations.

Higher volumes easy operated with the ProFillomat 155.  
Automated proces will move the AutoFilloMat to a production unit!
